Liner Plus

LUXURY NEEDS SPACE TO EVOLVE. AND HERE IT IS.

Weighing more than 7.5 metric tons and measuring up to 11.50 meters in length and 2.50 meters in width – the majestic appearance of the Liner Plus is an impressive sight for all to see. Four strong chassis are available to choose from: we build the Liner Plus on the Iveco Eurocargo, MAN TGL, MAN TGM and Mercedes Atego, which has a 299 bhp in-line six-cylinder engine to ensure adequate motorisation. The interior of the Liner Plus is just as stunning, with a perfect combination of high-end furnishings and maximum use of space. Choose one of the nine various floor-plan layouts you would like – we will make your dream of having your own customised premium vehicle a reality.

ELEGANCE. AND NO
FALSE MODESTY.

The living room. The exquisite interior design makes travelling in the Liner Plus an unforgettable experience. Enjoy the unashamedly luxurious comfort, surrounded by the finest materials with the best possible workmanship. Two lines of furniture are available, in Wenge and Cherry Fineline optics. The new Soft-walk flooring and the latest generation of entertainment media also contribute to this maximum comfort.

FUNCTIONALITY THAT YOU CAN SEE.

The kitchen. The L-shaped kitchen of the Liner Plus is thought out down to the last detail. High-quality kitchen appliances, spacious cupboards and generous worktops fulfil the requirements of even the most ambitious chefs. And for those who prefer to let others do the cooking, just the sight of the fine décor is a real delight.

SPA-LIKE OASIS FOR THE WELL-RESTED.

The bathroom. The bathing environment of the Liner Plus really resembles a five-star hotel. High-quality fittings, a heated towel rail and the large shower all create a uniquely pleasant atmosphere. For a refreshing morning spa programme, for your home away from home.

DREAMSCAPE OVERSIZED.

The bedroom. The beds in the Liner Plus are very generously sized. This applies to the rear bed variant as for the optional front fold-down bed. The bed systems in the spacious rear come with high-quality cold foam mattresses and sprung bases and are the beginning of a relaxing and wholesome sleep.

T

THE BEST VIEWS FOR A PLEASANT JOURNEY.

The driver's compartment. Our idea to position the driver's compartment higher up eliminates the usual steps to the driver's area and creates a single level throughout the whole living room – completely insulated from the driver's compartment right through to the rear, without any trip hazards, drops or recesses. And this is accompanied by additional space and a raised seating position at the wheel, thus ensuring a better overview in traffic. The sound system and navigation system are also perfectly positioned.

Cherry

Cherry with high gloss cupboard fronts (added option)

Wenge

Wenge with high gloss cupboard fronts (added option)

THE FURNITURE LINES – CLASSIC STYLE OR CLASSY AND MODERN.

The design concepts. Two different design options, both of which create a feeling of space: The Liner Plus is available with furniture in noble Wenge wood finish (standard) or traditional cherry Fineline optics. High gloss cupboard fronts are available as an added option. The resilient soft-walk floor covering in the colours, antia anthrazit or as option in yacht look effect is ideally matched to each particular furniture line.

LE

EXPRESSIVE IN ITS INTERIOR QUALITIES.

Leather and fabrics. Choose from various leather and microfibre covers; a few examples of these can be seen on the right-hand side. All materials are meticulously manufactured in selected workshops, adhering to Concorde's strict quality requirements. To allow them to retain their typical qualities for as long as possible, they undergo an innovative waterproofing process: our microfibre materials are equipped with ConLotus, whilst our leathers are equipped with the anti-soiling Aquaderm X-Shield. Dirt does not stick, liquid simply rolls off, and the feel and suppleness are preserved. In addition, you can choose the Concorde designed Redonda upholstery. This ensures optimum grip, relaxes the spine and supports the lumbar region.

SIMPLY WONDERFULLY THOUGHT THROUGH. TECHNOLOGY AND OTHER FEATURES.

A Jehnert soundsystem. The Jehnert soundsystems are perfectly integrated into the motorhome environment. The system comprises a 3-way speaker in the driver's compartment, a 2-way speaker in the living room, double-bass reflex subwoofer, a sound processor and vehicle-specific frequency crossover. The Hi-Fi systems are made in Germany and are optionally available for the Liner Plus.

B Mastervolt. The Mastervolt battery-management system monitors the charging cycles of the batteries, ensures a perfect utilisation of the storage capacity and prevents deep discharge. In the event of a weak mains connection, the Mastervolt system supports the land-based power. It can be controlled using a clear operating element with a battery monitor, and is available for all Concorde motorhomes.

C Truma air-conditioning systems. For perfect air conditioning, Concorde motorhomes can also be equipped with a Truma air-conditioning system upon request. There are two variants to choose from: a 2400 W system for the living room, as well as (from the Liner Plus 990 G) a 2 x 2400 W system for the living room and sleeping area/bathroom. The systems are installed in the raised floor and can be controlled conveniently using an infrared remote control. What's more, Concorde is the first company in the motorhome industry that has the **Premium Comfort Climate Label** from Truma. It distinguishes us for offering our customers the highest levels of cooling comfort.

D Rear bed with sprung base. In this modern sleeping concept, a refined sprung base replaces the previously used slatted frame. The high-quality cold-foam mattress and the adjustable headrest also ensure a particularly comfortable night's sleep. The rear bed with sprung base is also part of the standard equipment in the Liner Plus.

E Front access hatch. Straight forward and easy access to all areas needing regular servicing. Be it water, oil or light bulbs, all can be immediately found in the compact front service hatch.

F Service flaps. The new service flaps on Concorde motorhomes make the intermediate floors perfectly accessible. This makes loading and unloading this cross-cut storage space, even with bulky objects such as camping furniture, significantly easier.

G Fully insulated front head board. Exclusiveness is sometimes there where no one can see it at first hand. Concorde replaces the original separation between the service hatch and cockpit with a fully insulated head board unit. This insures a complete insulation without compromise of the camper, in accordance to our concept of an all year camper. Our plan for all seasons.

H Alde hot-water and gas central heating. Hot-water and gas heating from Alde heats the vehicle consistently and thus maintains the natural air humidity. The temperature can be controlled individually using the thermostat as well as a timer. This doesn't stir up dust like conventional blower heaters do. The boiler is equipped with electronic heating cartridges which can either be used separately or in combination with liquid gas. An Alde system has a duct shut-off and an integrated hot-water boiler which supplies all tapping points. It is included in the standard equipment for all Concorde motorhomes.

FLEXIBILITY REFLECTED IN MANY FORMS.

The floor plans. Choose from nine various floor plan variations, each with three rear-bed and seating-group options. What's more, we are also offering you four Liner Plus models including garage – for even more independence on the go.

OUR DRIVE FOR YOUR PASSION.

The essence of mobile travel. Concorde is committed to the concept of quality craftsmanship. We manufacture motorhomes of the highest quality for the highest demands. Every vehicle is unique, every vehicle is a masterpiece, classically hand-crafted in a traditional Franconian company, with unwavering passion, enthusiasm and inspiration. Because a passion for motorhomes is what unites the people at Concorde. And it is that which unites us with you.

“We work in eight areas of expertise in the production department. Every day, we step up to the claim of manufacturing absolutely top-class vehicles and constantly becoming that little bit better.”

Martin Rosenbaum
Head of production

“We construct motorhomes for people with a passion for motorhomes. We have designed many things for everything up to the completion of such a vehicle. But we’ve also discarded just as much. After all, only the best ideas will do.”

Hermann Kaiser
Head of development

“In the service department, we provide straightforward assistance and solve problems quickly. Only the customer can decide whether we have done a good job. We are only completely satisfied with our own performance when the customer is.”

Armin Dietz
Head of customer service
