# elnagh

**ELNAGH IS AN INTEGRAL PART OF THE HISTORY OF THE ENTIRE RECREATIONAL VEHICLE INDUSTRY WITH 70 YEARS OF ACTIVITY BEHIND IT.**

## **ARCHITECTS OF IDEAS, CREATORS OF UNIVERSES**

Before telling a story, Elnagh tells its vision, a point of view on the future that began when no one was talking about aesthetics, design and made in Italy. Elnagh is continuously listening. If you do not listen, you cannot be heard, just as if you do not observe, you cannot create any novelty. Every project is function and emotion, every detail is research and awareness: this is the sense of creating for Elnagh, drawing a movement of ideas around the journey. Elnagh is the brand for those looking for practical, functional solutions for their motorhome travel. It offers a complete range of models and types. Historic ranges with a long tradition, recognised and recognisable, which are never old fashioned.

## **ELNAGH IS AT YOUR SIDE!**

Your Elnagh dealer can advise you on the choice of the most suitable vehicle for you and respond competently to your requests. The qualified points of sale that distribute the Elnagh brand today give the brand real added value. An organised, targeted network supported by continuous training on technical topics and workshop interventions.

# WHY CHOOSE ELNAGH

## SPECIALISATION, SOLIDITY AND STRENGTH

The guarantee of a consolidated production for well over 70 years together with the knowledge, expertise and experience of the Elnagh production team will provide you with a solid and durable vehicle.

## CONCRETE AND PRACTICAL SOLUTIONS, FUNCTIONAL SPACES

Elnagh has always paid particular attention to technological, construction and quality solutions that guarantee a motorhome full of concrete and practical contents, in short, an intelligent motorhome.

## CLASSIC TASTE WITH ATTENTION TO DETAILS AND COMFORT

It offers elegant solutions in a classic style, with special attention to living comfort. It refrains from contrasts or stylistic excesses. Elnagh is a product that remains constant over time, it never goes out of fashion.

## THE RELIABILITY OF A WELL BUILT VEHICLE

with a **10-year guarantee against infiltration**, high-performance materials and state-of-the-art manufacturing processes.

10 YEAR GUARANTEE  
BODY PROTECTION

[elnagh.com](http://elnagh.com)

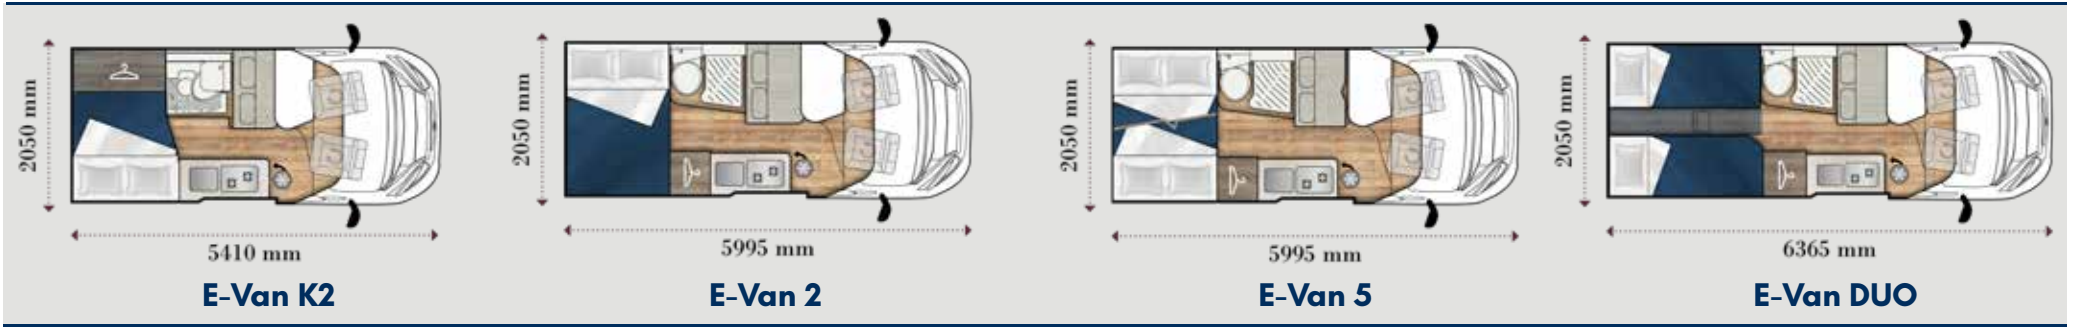

\*Carry out regular maintenance at the authorised Elnagh network and the tests provided for the control of infiltration to be carried out during the service coupons as per the specific deadline specified in the warranty booklet. For the detailed conditions ask the authorised sales network.

## THE BEGINNING OF THE ADVENTURE

### DESIGNED FOR THOSE IN SEARCH OF UNIQUE EXPERIENCES

If you are looking for your first van and you want a solid vehicle, with a simple, practical and essential style but with everything you need to be for your adventures, E-Van is for you. Four are the choices available: E-Van K2 of 5.41 m - the most compact in the range - only 5.41-m long with rear double bed, E-Van 2 of 5.99 m with transverse bed at the back, E-Van 5 of the same length, provides two bunk double beds placed at the back and finally E-Van Duo, the longest in the range, which offers comfortable twin beds in 6.36 m.

STANDARD HEATING SYSTEM	COMBI GAS 4KW	COMBI 4KW GAS	COMBI 4KW GAS	COMBI 4KW GAS

S= standard O=optional - = not available

The mass in running order includes the weight of the empty base vehicle, of the driver (75 kg), 100% of the fuel (60-l tank), fresh water (tank filled with 20 l while travelling), and aluminium gas cylinders (max.15 kg) filled to 90% of their capacity, and tolerance specified in the type-approval (+/- 5%) (2007/46/EC). Anything not included in the standard version of the vehicle, both living unit and chassis, results in an increase in weight in running order with resulting decreased payload up to the possible reduction of approved seats in the case of the total weight for the available payload value. The available payloads result from the difference between maximum permissible mass and running order mass and have a tolerance of 5%. During the purchase phase it is necessary to check the weight of the options to be installed on the vehicle.

The mass in running order includes the weight of the empty base vehicle, of the driver (75 kg), 100% of the fuel (60-l tank), fresh water (tank filled with 20 l while travelling), and aluminium gas cylinders (max.15 kg) filled to 90% of their capacity, and tolerance specified in the type-approval (+/- 5%) (2007/46/EC). Anything not included in the standard version of the vehicle, both living unit and chassis, results in an increase in weight in running order with resulting decreased payload up to the possible reduction of approved seats in the case of the total weight for the available payload value. The available payloads result from the difference between maximum permissible mass and running order mass and have a tolerance of 5%. During the purchase phase it is necessary to check the weight of the options to be installed on the vehicle.

# INSULATION

## EXCELLENT THERMAL AND ACOUSTIC INSULATION IN ALL SEASONS

### E-VAN INSULATION

The insulation in E-Van is obtained by means of polyurethane foam which is sprayed into the interior walls of the vehicle. This material is resistant, functional and multipurpose: today it represents the best insulating solution in thickness, cost and performance ratio. The floor is made of a sandwich panel and the roof is insulated with polyester fibre covered with aluminium film.

### E-VAN TREND AND E-VAN PREMIUM INSULATION

High performance materials, full coverage and no thermal bridges

The covering of the roof, walls, crossbars and uprights is made entirely of polyester fibre covered with aluminium film, manufactured in two thicknesses (20 mm and 10 mm) to ensure its fitting everywhere, even in cavities. The uniformity of the covering keeps the internal temperature constant.

### BODY PROTECTION SYSTEM

The unique technology for insulating the interior of the van from outside temperatures and noise provides insulation due to the absence of thermal bridges to the outside and acoustic insulation.

### TESTED SOUNDPROOFING

The external noise tests (using a calibrated sound level meter certified by the SIT centre) also showed that the noise perceived inside the van in the rain is 37% lower in the dinette area and 30% lower at the back. Tests in a climate chamber according to EN 1646-1, whereby a vehicle placed at -15°C must reach +20°C in 4 hours, have shown that the BPS insulation:

- reduces the time to reach pleasant temperatures inside the vehicle by 50%, even when starting from extremely cold conditions;
- increases the uniformity of temperature inside the various areas of the van by more than 65%
- maintains temperatures with greater consistency and longer for more comfortable stay.

10 YEAR GUARANTEE  
BODY PROTECTION

## MORE INSULATION, MORE PROTECTION LESS NOISE

### 10-year warranty AGAINST INFILTRATIONS

# VAN IN WINTER

## COLD WINTER IS NO LONGER A PROBLEM ON BOARD YOUR ELNAGH E-VAN!

### ENJOY YOUR ADVENTURES IN THE MOST EXTREME CONDITIONS!

Choice of gas or oil heating, combined or electric, 4 or 6 kW. Elnagh tested its vans in a climate chamber based on the EN 1646-1 standard, according to which a vehicle placed at -15°C must reach an internal temperature of 20°C within 4 hours after the heating systems have been switched on. Elnagh, in its basic configuration, fully achieved the target in just over 3.5 hours, getting a 'grade 3' performance

#### PLUS...

For colder climates, Elnagh offers 2 special packs. In addition, for heating, you can choose between gas or diesel, combined or electric, 4 or 6 kW.

#### ARTIC PACK (OPTIONAL)

Heater increased to 5 or 6 kW, depending on the range - Digital multi-control panel - Winter Pack - Thermal cover for cab dashboard - External thermal cover for the cab - Curtain kit (pleated dinette curtain and rear door curtains) - Thermal insulating window covers

#### WINTER PACK (OPTIONAL)

You will find it included in the Arctic Pack but you can also have it on its own!

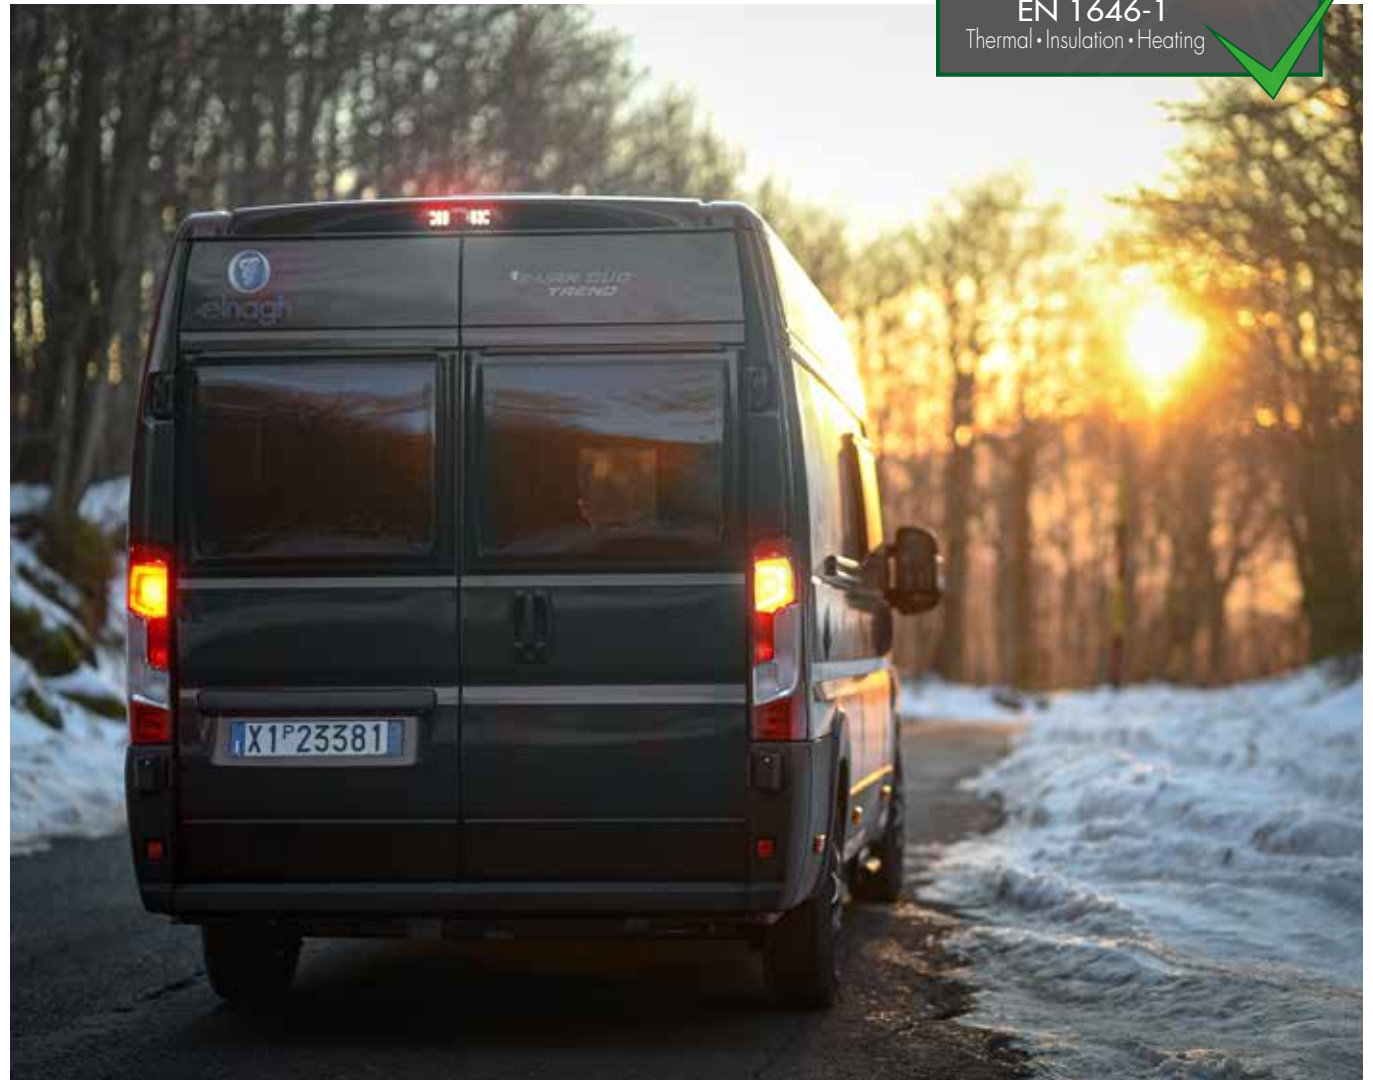

Grey water tank insulated with a 15-mm layer of polyurethane - Electrical probe with thermostat positioned close to drain valve - Insulation of external water pipes - Insulation of external heating pipes

GRADE 3  
WITH AND  
WITHOUT THE  
PANORAMIC ROOF!

## Grade 3

EN 1646-1  
Thermal • Insulation • Heating

Arctic and Winter packs are not available for the E-Van K2 - E-Van K2 Trend - E-Van K2 Premium models

# STORAGE

**INTELLIGENT SOLUTIONS.  
VERSATILE, MODULAR SPACES, JUST THE WAY YOU WANT THEM.**

ON BOARD ELNAGH VANS THE INTERIOR SPACE IS OPTIMISED FOR MAXIMUM FUNCTIONALITY: THE STORAGE COMPARTMENTS ARE DESIGNED TO SUIT YOUR TRAVEL AND HOLIDAY NEEDS.

The bed bases are liftable and/or removable - partly or completely  
- To manage load volumes flexibly, according to your needs.

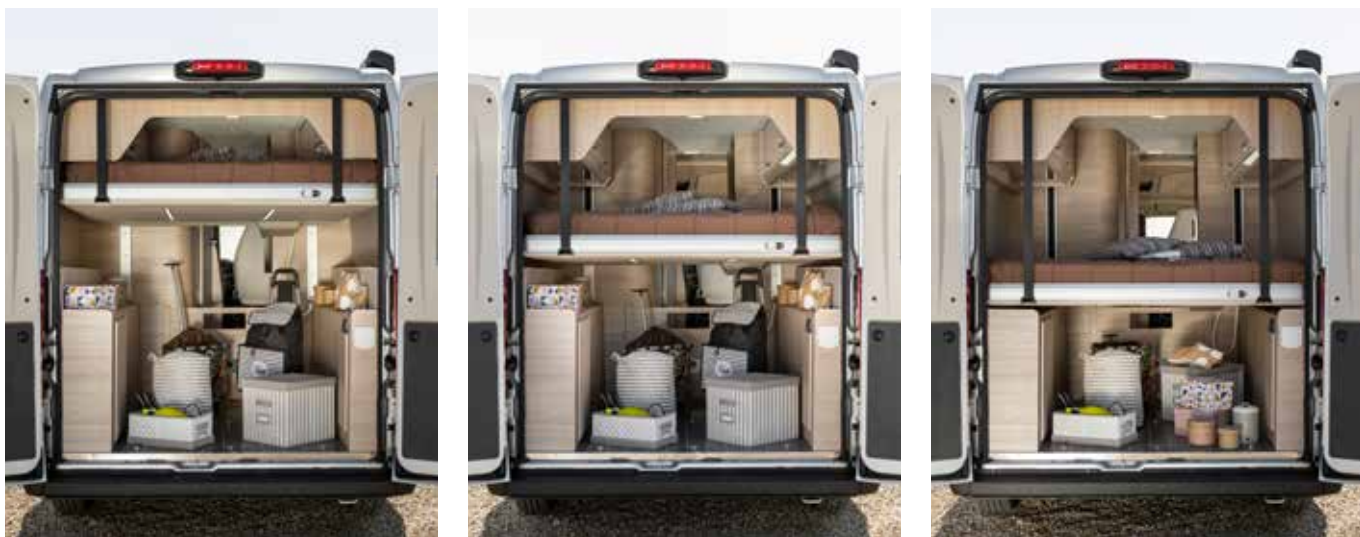

## E-VAN DUO

**THE ONLY VAN THAT ADAPTS ITS LAYOUT TO YOUR  
LOADING REQUIREMENTS:**

- Removable bed bases
- Three wardrobes that can be removed separately
- Removable, adjustable-volume double flooring

## E-VAN DUO XL

### THE ADJUSTABLE VOLUME GARAGE FOR AN EXTRA LOAD

With the electronically-operated rear bed supported by straps, that stops where you want it to, the E-VAN DUO XL offers you a rear storage compartment with a variable volume of between 1,500 and 2,400 litres. That way, even at night, your bicycles and your sports equipment will stay safe! The garage is equipped with an electrical socket and a water outlet with pull-out spray.

To exploit the full potential of the garage, the antislip aluminium sheet metal coating and the access ramp are available as optional items.

Some of the features shown do not correspond to the final features of the vehicle for the current season.

---

# RAISING RETRACTABLE ROOF

ORGANISING SPACES IN A FUNCTIONAL WAY

Some of the features shown do not correspond to the final features of the vehicle for the current season.

- **MORE ROOM TO SLEEP**
- **MORE ROOM TO STOW**
- 2 EXTRA SLEEPS
- POSSIBILITY TO USE THE BACK OF THE VAN ONLY AS STOWAGE

- **MORE COMFORT FOR YOUR REST**
- BED DIMENSIONS AMONG THE LARGEST IN THE CATEGORY: 200X130 CM (+ 20 CM IN LENGTH, + 10 CM IN WIDTH)
- WITH LED SPOTLIGHTS AND STORAGE POCKET.
- SIDE WINDOWS THAT CAN BE OPENED AND CLOSED FROM THE INSIDE WITH FLYSCREEN AND CURTAIN FABRIC.

- **MORE LIGHT ON BOARD**
- COMPATIBLE WITH THE PANORAMIC ROOF FOR A BRIGHT, PLEASANT LIVING AREA.

- **MÁS AISLAMIENTO TÉRMICO**
- THANKS TO THE LAYER OF POLYURETHANE FOAM PLACED BETWEEN THE MATTRESS AND THE SHEET METAL ROOF.

- **EASIER ACCESS**
- THANKS TO THE 70X50 CM ENTRANCE COMPARTMENT.

# PANORAMIC ROOF

FOR AN EVEN BRIGHTER LIVING AREA

## RESISTANT, SOLID, DURABLE

THE PANORAMIC ROOF IS THE IDEAL SOLUTION FOR THOSE WHO WANT AN EVEN BRIGHTER, COMFORTABLE AND PLEASANT LIVING AREA.

It is formed by an external frame in black methacrylate and internal glazing in laminated glass with sun-proof screen printing perimeter. The panoramic roof is available as an option on models in the E-Van Trend and E-Van Premium ranges

## TESTED IN CLIMATE CHAMBER

**CLIMATE CHAMBER TEST**  
FROM -15°C TO 40°C.

**HEAT RADIATION TEST**  
ON THE PANORAMIC ROOF SURFACE AT 65°C; 75°C; 80°C; 85°C.

**LOW TEMPERATURE TEST**  
(FREEZING TEST -15°C) TO CHECK FOR POSSIBLE ICE FORMATION IN THE PERIMETER OF THE GLASS AND ANY DAMAGE OR MALFUNCTION.

**VIBRATION TEST**  
WITH SIMULATION OF 820 KM ON SPECIAL ROUTE (COBBLESTONES).

**INFILTRATION TEST**  
CARRIED OUT DURING LOW TEMPERATURE AND VIBRATION TESTS.

**VISUAL CHECK**  
TO IDENTIFY ANY DAMAGE OR DEFORMATION IN THE PANORAMIC ROOF SURFACES

# CHASSIS FIAT

Created from the continuous cooperation with manufactures, Fiat Ducato is the perfect combination of chassis and living unit. There are many provisions to facilitate the transformation, a dedicated electrical system and a cab designed with reinforced uprights and pre-cut roof

Euro 6D Final

120 CV

140 CV

160 CV

180 CV

## STANDARD

### DASHBOARD - NEW

Ducato offers a brand new dashboard:

- Heavily renovated
- Fully Re-designed
- Featuring new Tech Contents
- Comfortable & User friendly
- New White Backlighting, extended to every single command

### ELECTRIC POWER STEERING SYSTEM - NEW

The brand new electric power steering system replaces hydraulic system on whole range.

Moreover, the new electric steering system offers:

- Power supply technology adapts steering effort to vehicle speed
- Increased steering precision
- Higher driving pleasure, while reduces effort during parking maneuvers
- Improves fuel consumption and reduce CO2 emissions thanks to the adaptive energy consumption
- Keep current steering ratio
- Engine bay is freed from former hydraulic power steering specific parts.

### STEERING WHEEL AND GEAR LEVERS - NEW

The new steering wheel is now a revolution for motorhomes maneuverability: New car-like design - three spoke style

The gear lever is more ergonomic and rounded, with an elegant glossy finish.

### ESC: ELECTRONIC STABILITY CONTROL - UPDATE

On new Ducato, the system has been upgraded, adding 3 new features:

- **CROSS WIND ASSIST.** Through the use of brakes, intervenes to help stabilize the vehicle through strong crosswinds, helping to keep the vehicle from drifting out of its lane
- **TRAILER STABILITY CONTROL SYSTEM.** Detects when a trailer is starting to oscillate and corrects any dangerous trailer swing, through a combination of either torque reduction and/or individual wheel braking
- **POST COLLISION BRAKING SYSTEM.** Intervenes in the event of an accident, automatically applying brakes to prevent secondary potential collisions

### CRUISE CONTROL

for complete relaxation at the wheel, the speed is constant and the foot is free to move. Includes Speed limiter, which prevents you from exceeding the set maximum speed.

### ECOPACK

consisting of: - Start and Stop system: for reduced fuel consumption. Automatically restarts at the touch of the accelerator pedal - Smart alternator: intelligent alternator that provides only the energy needed - Electronic fuel pump: for energy saving and high fuel efficiency.

### MANUAL CAB CLIMATE CONTROL

enhanced and diffused ventilation to the entire cab.

# QUALITY AND TEST

BECAUSE WE KNOW THAT  
SATISFYING OUR CUSTOMERS  
DEPENDS GREATLY ON THE QUALITY  
OF OUR PRODUCTS.

Elnagh puts its own experience and expertise at the service of every van produced and follows it throughout the production stage with inspections and tests from design to delivery that meet European standards.

The same quality standards are demanded of suppliers: for the most strategic components, a check is carried out when the material is received and before it is used in production.

## CHECKS IN PRODUCTION STAGE

Test on operation of the gas pipes.

Correct installation of the hydraulic systems.

Check of operation and correct installation of the electrical systems.

## TESTS IN RESEARCH, DEVELOPMENT AND PROTOTYPING STAGE

Specific testing in climatic chamber to check the resistance, duration and performance of the materials selected at extremely high/low temperatures

Performance tests on the components used. Durability of materials, resistance to stress, reliability and compliance with European regulations in the design of the seatbelt unit.

100 statistical checks on a percentage of the vehicles produced: aesthetic, functional, noise and fitting tests.

## TESTS ON FINISHED PRODUCT

Waterproofing tests on 100% of the vehicles produced, before delivery.

Gas system inspection by certified staff according to the German DVGW protocol

Electronic weighing of 100% of vehicles before delivery and written weight certification for end customer

## ELNAGH IS MOTORHOME AS WELL!

DISCOVER WHAT'S NEW IN THE MOTORHOME  
RANGE IN THE 2022 MOTORHOME CATALOGUE

**[elnagh.com](http://elnagh.com)**

TO FIND OUT WHAT'S NEW AND SHARE YOUR OPINION FOLLOW **ELNAGH ON SOCIAL CHANNELS**

**NOTES**

The masses indicated in this catalogue refer to the provisions of European Directive 2007/46/EC.

**MASS IN RUNNING ORDER**

It includes the weight of the empty base vehicle, of the driver (75 kg), 100% of the fuel (60-l tank), fresh water (tank filled with 20 l while travelling), and a gas tank for living purposes (20 kg).

The mass in running order, and consequently the payload and/or certified seats may vary depending on the accessories installed.

**PAYLOAD**

This consists of the difference between the maximum technically permissible laden mass and the mass in running order. It includes elements for living purposes, the transported passengers defined by the manufacturer (driver excluded), and the personal effects.

The payload calculation is based on the following parameters: 75 kg for each passenger (driver excluded), 10 kg of baggage for each passenger and for the driver, 10 kg for each metre of length of the vehicle, plus the remaining payload, which can be used for the installation of accessories or for additional baggage.

All masses and loads of the empty vehicle have a tolerance of +/- 5%, in compliance with Directive 2007/46/EC.

Any optional equipment increases the mass in running order and decreases the payload.

The weight of non-standard accessories is not included in the mass in running order indicated in this catalogue.

Additional accessories and devices reduce the payload by a quantity equal to their weight; the incidence of the weight of the individual accessories is shown in the special column in the technical data sheets or can be requested at our dealers.

In case certain accessories are installed (for example, additional elements such as coupling device or motorbike rack), the mass of these accessories will affect the payload, possibly reducing it along with the number of certified seats. Please note that the law does not allow the maximum permissible mass to be exceeded, which can be consulted under the specific heading of the data sheets.

Please make sure that the maximum loads on the axles and the maximum technically permissible load mass are not exceeded during the complete loading phase of the vehicle.

The regulations and requirements of each country may entail changes in the characteristics of this table.

The number of certified seats may vary depending on the traffic regulations in force in each country.

When driving, the fresh water tank must be filled to a maximum of 20 litres.

**This catalogue does not represent contractual documentation, but only general information.**

SEA S.p.A. operates with an Integrated Environment and Safety Management System.

#### NOTES

ELNAGH reserves itself the right to change the characteristics and the furnishings of all its models with no advance notice required; all data contained in this leaflet must therefore be considered approximate and non-binding. Despite thorough checks of the contents, we cannot exclude possible printing and/or translating errors.

This catalogue does not constitute contractual documentation.

For the above reasons, all information relating to the specifications and equipment of each model must be requested prior to purchase from the dealer, who, as the sole contact person, will confirm or correct the data published by updating the customer on the characteristics and actual equipment of the relevant vehicle being negotiated.

Any reproduction, including in part, of the text or of the content of this document is prohibited.

The indicated weights are exclusively approximated. Tolerances of +/-5 % are allowed.

Generally speaking, special equipment and options increase the no-load weight and entail a reduction in the payload.

We hereby decline any and all responsibility in case structural changes are made to the vehicle; any assembly, disassembly or changes carried out by unauthorised workshops may jeopardise your safety and cause the warranty clauses to be forfeited.

For additional information on installation and technical details, please contact one of our dealers.
