

Roller Team is a company gaining an ever greater following, also at an international level, and one of the most significant production models in the European motorcaravan industry.

Established on the foundations of knowhow from a historic company on the motorcaravan scene, Roller Team can offer competitive products both in terms of price and equipment, which are at the cutting edge thanks to the excellent construction techniques adopted.

Customer satisfaction, understood as the ability to provide products and services that perfectly meet their expectations,

is Roller Team's mission, a mission that it pursues thanks to experience acquired over time plus the capacity to reinvent itself in accordance with the habits, trends and changes of the market and the rapid succession of new technologies.

One of the main advantages of choosing a big name is the certainty of the best product quality permitted today by technology, materials and a complex industrial process.

That's the reason for choosing Roller Team, which works day after day to improve its products and services, making quality its priority so that the price of the product is reflected in its genuine value.

## the choice of value and reliability.

Roller Team: the certainties

## more insulation, more protection, less noise. The technology for building living quarters capable of ensuring complete protection for your motorcaravan. Noise Reduction

inside the vehicle when driving.

BREATHE

The motorcaravan that "but thought to correct integral."

## The motorcaravan that "breathes" thanks to correct internal air distribution, favouring circulation, making the temperature uniform and preventing condensation from forming.

## The Italian with "Nordic" features Always at ease in the vehicle, whatever the temperature outside: a motorcaravan designed and built for use in colder climes.

## 8590 litres of freedom. A garage locker lesigned for you to take your freedom with you unywhere at all times.

Spaces for your world and your relationships, designed for everyday needs and to promote maximum practicality and

motorcaravan with original

Roller Team accessories

Travel All Inclusive. Solutions for super-equipped motorcaravans with complete equipment for all models. Personalise your

Roller Team puts its own experience and expertise at the service of every motorcaravan produced. A team dedicated to quality control and continuous improvements follows each motorcaravan throughout the production stage with inspections and tests from design to delivery.

## +insulation+protection-noise

Discover ExPS EVO

#### ExPS EVO TECNOLOGY:

the technology for building living quarters, applied to walls, roof and floor, capable of ensuring complete protection for your motorcaravan in terms of:

- Greater thermal and acoustic insulation;
- Greater protection from the elements;
- Greater structural resistance:
- Complete insulation of areas in contact with the outside;
- Total protection of the underfloor from all elements;

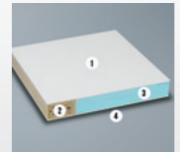

- Roof
  1) Anti hail roof in fiberglass.
- 2) Extruded plastic inserts in areas in contact with the outside.
- 3) Roof thickness with Styrofoam® for a greater insulation and protection.
- 4) Fiberglass. Wood free.

- 1) Walls in fiberglass. No contact between exterior and interior.
- 2) Styrofoam® in all walls: better soundproofing and thermal insulation of the vehicle, it prevents any spreading of leaks to the vehicle interiors.
- 3) High density extruded plastic: it prevents any contact of the inner part of the walls with the water.
- 4) Internal walls in fiberglass. Wood free.

#### Floor

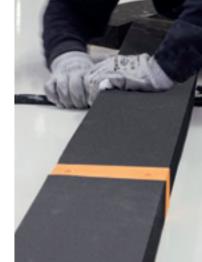

- 1) Floor in Styrofoam®. Floor thickness 54 mm, utmost resistance to shocks.
- 2) Lower and upper fiberglass covering for enhanced protection, thermal insulation and resistance.
- 3) Internal ceiling in pvc.
- 4) Perimetral protection in extruded plastic.

## ExPS evo evolves

Through study of the connection between furniture and walls, Roller Team proposes a new assembly system for internal components. Noise Reduction Technology is here, ensuring greater comfort when travelling thanks to better build quality.

The furniture features protection with soft material for furniture-outer body connection.

A plastic spacer separates the lower floor from the chassis rail.

With Extreme Protection System EVO, 6 years' peace of mind!

By study of interior climate and air circulation Roller Team offers a motorcaravan that "breathes".

## mattresses

of the rear beds in polyester fabric, quilted top and sides, with breathable technical fabric in the bottom part (except overcab and elevating bed models).

## breathe made to breathe

The "Breathe" project promotes the study of air distribution inside a motorcaravan promoting circulation, rendering the temperature and avoiding the formation of condensation.

## all fixed bed

in the rear part or overcab with staves.

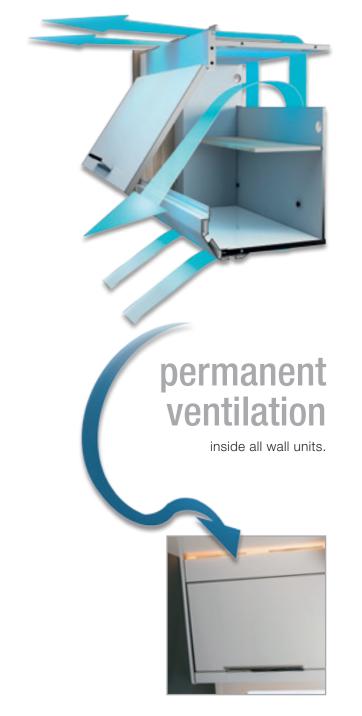

heating in all models with rear twin beds or rear fixed double bed.

are positioned in the dinette at a small distance from the interior side panel.

# the Italian with a Nordic disposition!

## Winter holiday included

Enhance your comfort on board still further with original accessories:

- Winter pack: 6000 W combigas or combidiesel heating, with CP Plus, tank insulation and electrical probe, electric heated external pipes, step insulation and insulated cab curtain.
- Heated windscreen. Heated electrically for defrosting. Protects against the sun's rays, lowering the heat transferred inside.
- Electric heated floor.
- Insulated pipe.
- Alde water heating system.
- Diesel or gas boosted heater, 6000W.
   Programmable cab heating.

Thumbs up from our northern customers

Roller Team is one of them!

A motorcaravan designed and built for use in the coldest climates: the construction techniques it takes, high-performance materials in terms of insulation and protection from the elements and specific equipment that's also been tested in the climate chamber.

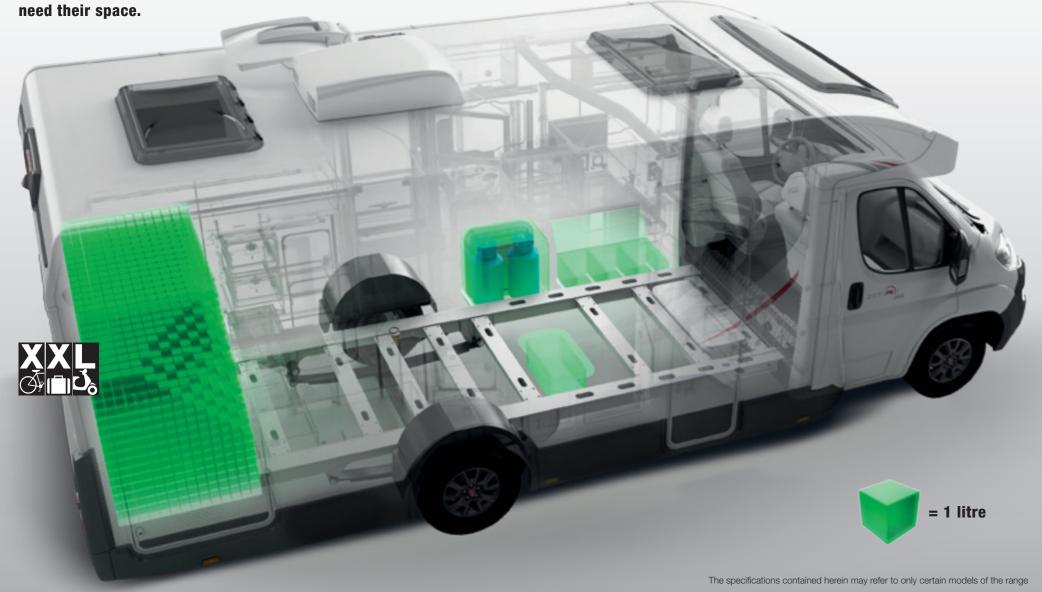

Designed for distribution From Northern Europe to Southern Italy, every Roller Team vehicle uses technologies and materials that ensure high performance and a perfect climate. So you're always at ease in your vehicle, whatever the temperature outside, Roller Team offers the technology you need...

The specifications contained herein may refer to only certain models of the range

## 3590 litres of freedom!

Because those with big projects

## The whole world in the garage!

## Easy to load.

- Double door for accessing the locker, passenger side and driver side.
- Doors that open to 180 degrees: extremely simple loading access.

## Also accommodates the unexpected.

Can transport up to 3590 litres of materials (Zefiro 295 TL model)

## Built properly.

- Lower fibreglass and upper fibreglass and PVC cover for greater heat insulation and mechanical resistance.
- With air vents for heating.

## So f(x) = f(x) it bends to your requirements.

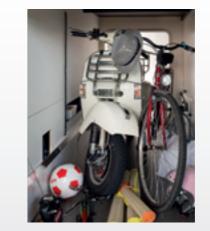

Where do you want more space? Adjust the volume of the garage to load more... or have a bigger room!

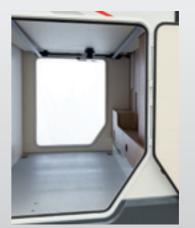

Flex Space, up-and-down bed system for flexible spaces and loads.

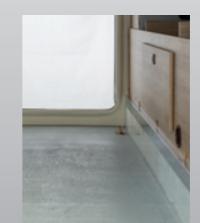

# You need space but hidden spaces too!

- Opening stowage locker in side band.
- Storage space in floor.
- Double floor in the Triaca range for greater stowage, including long items, greater heat and acoustic insulation for the cab and increased structural rigidity.

## twin beds

unique, different and really, really flexible!

and Integral and Granduca 284 TL, M models, **Flex Space** allows you to adjust the height of the twin bed surfaces to limit or extend the garage area.

Freedom to manage the space between the twin beds and garage at any time, and to make use of the comfort of the bed area in one moment and the capacity of the load compartment at another as you please.

The specifications contained herein may refer to only certain models of the range

#### Spaces designed by expert hands in a continuous exchange of usability, necessity and practicality.

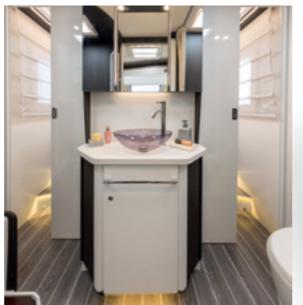

Roller Team, a well-made motorcaravan able to guarantee:

- Spaces to experience to the full.
- Room for everything.
- High-performance materials suited to everyday use.

## spaces to experience to the full

- Floor on a single level, without steps.
- Internal height of more than 2 metres.
- Folding table for an adaptable space.
- Sliding doors for your privacy, separating the living area from the sleeping area.

## in the kitchen, everything in its place

Flexible, practical use, like the kitchen at home.

## everything to hand and space for everything

 Completely pull-out tall storage units for bottles and small containers. With lock.

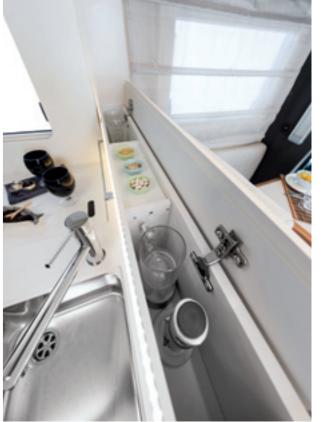

The specifications contained herein may refer to only certain models of the range

 Rotary pull-out sliding baskets with chrome metal edges.

# sleep well, sleep long Here are our rules for getting up

on the right side of bed.

 Bottom of mattresses made of technical, quilted breathable fabric. Top and sides made of quilted polyester..

 Electric elevating bed, which can be locked into every position, that leaves the dinette and kitchen free at all times.

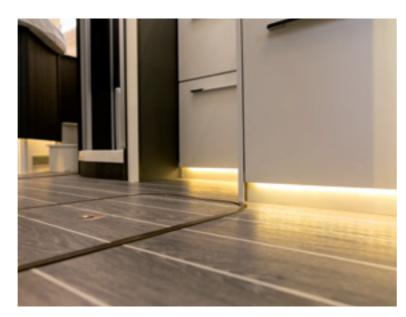

Large overcab with lots of usable space: internal height at centre 700 mm.

Fifth bed that converts into dinette.

 Slatted bases. LED lighting for the beds and the whole sleeping area. The specifications contained herein may refer to only certain models of the range

LED night-time courtesy lights.

Twin beds with additional bed.

Perimeter heating for rear beds.

Windows and skylights for aeration and lighting.

# New ideas to make a motorcaravan, your motorcaravan

## Choose your driving profile

Safety. A driving assistance systems that helps the driver cope better with unexpected events that may occur on the journey. The Traction+ package includes: vehicle stability control device, the Hillholder assistance system for climbs, or Hilldescent system for coming down, and the traction support device for poor grip on a single drive wheel.

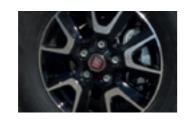

Every journey will be accompanied by your favourite soundtrack thanks to the High-Level radio with or without navigator with USB port or by the freedom to talk and use your smartphone even when you're driving. Also available in touchscreen and DAB version.

To ensure that you have maximum visibility and safety with the LED DRL headlights or fog lights, excellent visibility with peerless lighting, and for longer.

Free up your left foot. With the automatic transmission, you increase safety and your personal comfort when driving.

The right rims for your touch of style. Rims are essential to the appearance of the whole vehicle. 15' alloy rims.

16" alloy wheel rims and composite suspension.

## Enhance the comfort of your motorcaravan

There's never all the space you want, and sometimes there's hardly any. That's where a folding table comes in: the perfect solution for combining the need to limit space occupied and prevent a lack of extra space for your daily needs. Space that can be adapted as you please

For the most eagerly awaited or unexpected guest! Easily convert the dinette into the fifth bed.

Music to your ears.

Don't give up on your passion: listen to all the music you want with the new Hi-Fi system for the living quarters, which will always be able to offer you a good mood and total relaxation.

## Made to measure for you

Choose greater operating time and a reserve of energy with peace of mind, with the double battery management panel.

Start the engine and get going, even in the winter. Yes, because with the electronic heated windscreen you don't need to wait for the normal climate control to defrost it any more. Ready, steady, go! In summer, it also protects against the sun's rays, lowering the heat transferred inside.

Stowage band:
Space to spare at your feet!

Winter holiday included with the specific optional winter equipment: Winter Pack, heated floor, diesel or gas 6000 W heater, programmable cab heater, Alde water heating

The specifications contained herein may refer to only certain models of the range

original accessories

Personalise your vehicle for your needs with ease:

here are our solutions to make your motorcaravan

accessories that adapt perfectly to the individual

models to increase their versatility, optimise their

Roller Team offers additional packages and

functionality and boost their performance.

even more unique.

Because we know that satisfying our customers depends greatly on the quality of our products.

## Tests in research and development and prototyping stage

Specific testing in climate chamber to check the resistance, duration and performance of the materials selected at extremely high/low temperatures

> Performance tests on the components used: durability of mattresses, resistance to stress, reliability and compliance with European regulations in the design of the seatbelt unit.

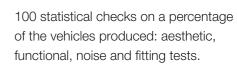

## Test on finished product Gas system inspection by certified staff according

## che

to the German DVGW protocol.

Waterproofing tests on 100% of the vehicles produced, before delivery.

before delivery and written weight certification for end customer.

## vehicles "UnderControl"

Roller Team puts its own experience and expertise at the service of every motorcaravan produced and follows it throughout the production stage with inspections and tests from design to delivery that meet with European standards

The same quality standards are demanded of suppliers: for the most strategic components, a check is carried out when the material is received and before it is used in production.

## Checks in production stage

Check on operation and correct installation of the electrical systems.

Correct installation of the hydraulic systems

Test on operation of the gas pipes.

## Don't stop dreaming. Now you can!

If you delight in outdoor holidaying but haven't yet been able to own a motorhome of your own, here's the solution for you. From Roller Team's experience comes Auto-Roller Special Edition, the affordable

Spaces designed for seeking functionality and flexibility in environments. A well-made camper for those who put the substance of freedom over style.

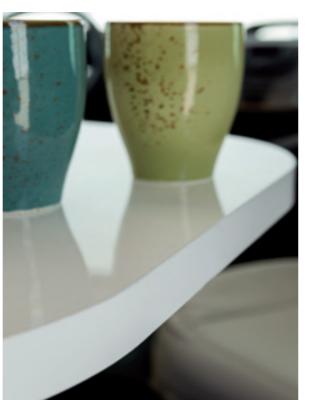

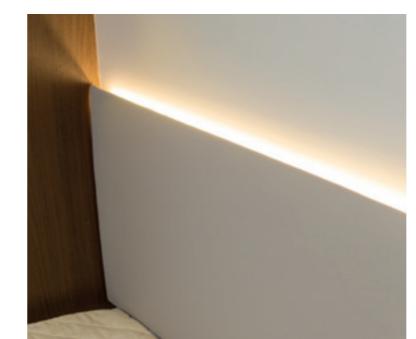

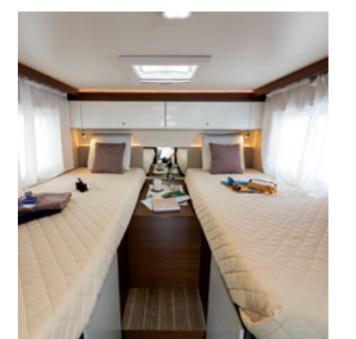

## Sleep sound and wake up too, you're not dreaming!

Your personal well-being.

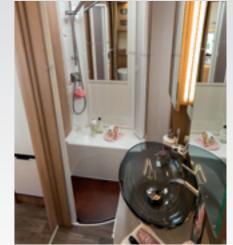

Flexibility and practical use, feeling at home in your motorhome.

Separate spaces and privacy.

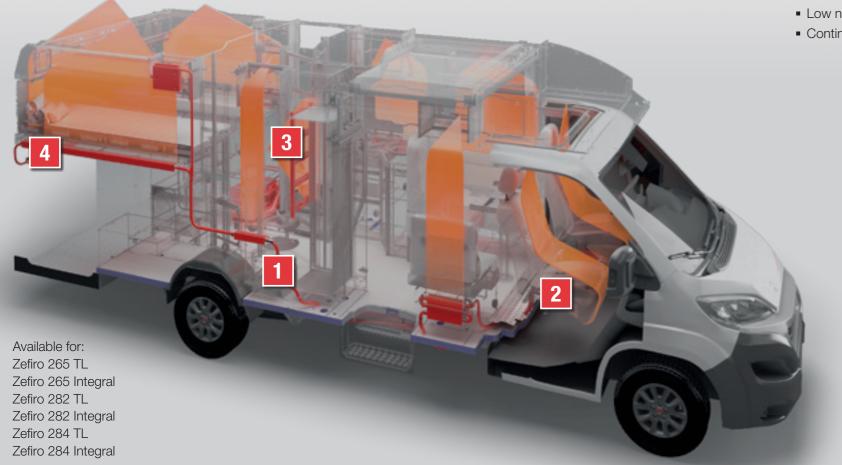

## According to the same principle that characterises domestic systems, the Alde heating system features a liquid heat-transfer medium which is heated by a gas boiler.

A pump circulates the heated liquid in a circuit of interconnected radiators. The radiators heat the air, which is distributed evenly within the motorhome through slits on the wall units. Once the air has cooled, it descends and, passing through slits in the floor, can heat up again and become warm within the circuit.

## Let's look at the advantages of heating with a liquid heat-transfer medium.

- Healthy atmosphere free from suspended dust and feeling of dryness
- Even and longer-lasting warmth
- Low noise and lack of ventilation
- Continuous production of hot water

- 1 Alde system along the entire perimeter of the motorhome for constant warmth.
- Hot water pipes under the driving seats.
- 3 Heated towel rail in toilette: genuine wall heating.
- 4 Radiator in rear garage locker.

## "Social kitchen" a space where the pleasure of cooking is

naturally associated with the pleasure of relationship. A wide passage that allows cooking, passing, stopping...all together!

## Zefiro, motorhome.

Original Fasp reclining driver and passenger seats, with double armrests and seat covers. LED lighting.

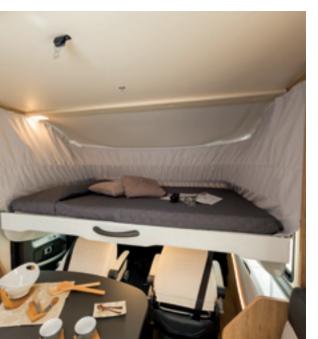

Internal passenger side stowage with double access door. With thermoformed elements and LED lights.

Glossy laminate and soft-touch elevating bed. Doesn't prevent use of dinette when lowered.

**Dinette** with folding table: the perfect solution for combining extra space and freedom of movement.

## In the kitchen, everything in its place.

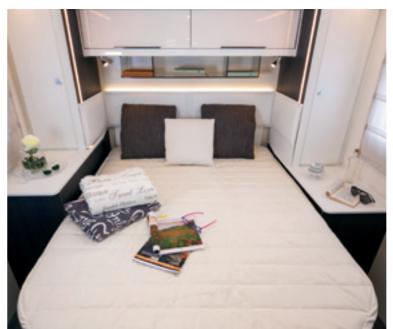

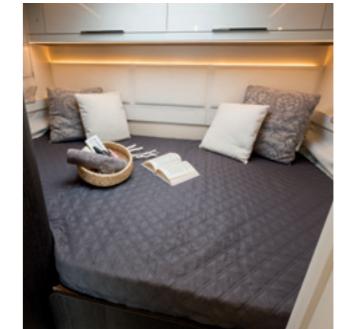

## Sleep well, sleep long.

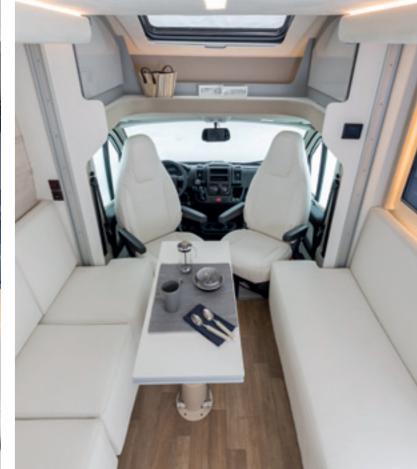

Your personal well-being.

## "Open Space", layout maximum room that can be used.

Ergonomic and volumetric design of the interiors and of furniture at the service of high habitability.

The living quarters were designed based on the concept of "functional flexibility", where all elements can be transformed: table, bed, sofa. A sofa that converts into a double bed through a manual, simple and fast lifting mechanism.

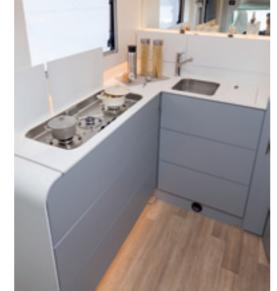

The use of innovative materials, with tops made of resin and nanotechnology (Fenix): hygienic and antibacterial, mould-proof, waterproof and resistant to heat, easy to repair in case of scratches, resistant to use.

## Autonomy and resource optimisation.

LIN BUS technology that allows "domotic-type" management of the utilities through a single connection that handles all electrical systems, to ensure better performance.

This technology makes it possible to manage utilities through a smartphone in Wi-Fi mode: turning on and off the lights, turning on and off the water pump, displaying the charge status of the batteries, displaying the levels of tanks.

"Energy Saving" control unit that allows constant monitoring of consumption to optimise the available resources and residual autonomy.

Smart technology: automatic turning on and off of indoor and outdoor lights when the living quarters' door is opened.

"Home" performance. Refrigerator with compressor and 165-I capacity, performance similar to a regular home refrigerator and freezer: quick cooling, internal temperature kept constant even in case of high outdoor temperature, low energy consumption and noise level.

## Double floor technical innovation for the structure.

#### A "real" double floor that offers:

- More stowage space and excellent access thanks to two side doors.
- Stowage capacity for long objects, tables and chairs.
- The installations are located in the space created by the double floor (fresh and drain water tanks).
- Excellent thermal and acoustic insulation.
- Higher structural rigidity.

## Roller Team, the certainties

#### + insulation, + protection, - noise.

The technology for interior insulation capable of ensuring complete protection for your campervan.

#### Campervan in the winter? Sure!

Those who say a campervan isn't right for winter holidays never tried a Livingstone. Roller Team campervans dispel this myth and offer everything you need for a problem-free holiday in cold climates.

#### Ok, today let's do it like this.

Single environment, multiple space. All the space is designed with a view to maximum functionality, modularity and ease of use.

#### In safe hands with motorcaravan "UnderControl".

Roller Team puts its own experience and expertise at the service of every van produced. A team dedicated to quality control and continuous improvements follows each motorcaravan throughout the production stage with inspections and tests from design to delivery.

Roller Team is a company gaining an ever greater following, also at an international level, and one of the most significant production models in the European motorcaravan industry. An established brand on the motorhome scene, today Roller Team also specialises in the production of outfitted vans.

For more than 10 years, Roller Team has specialised in campervans, which are built in the factory in Paglieta (Abruzzo), an industrial centre of more than 28,000 m<sup>2</sup> which produces more than 4,000 vehicles a year for the Trigano group.

The Livingstone Roller Team range is distributed through selected and expert

## Roller Team: great experience at the service of design and construction

dealers able to offer professionalism and expertise thanks to continuous product training.

One of the main advantages of choosing a big name is the certainty of the best product quality permitted today by technology, materials and a complex industrial process: that's what makes the Livingstone campervan an excellent product marked by great quality.

All models are the result of a specific know-how, reliable and functional, with an attractive price and innovative solutions: great experience at the service of design and construction.

The Livingstone range offers 7 layouts in two versions: **Sport**, for those who favour functional vehicles at an attractive price, and **Prestige**, featuring exclusive design with the finest equipment, all as standard

## Sport version nimble and substantial, for travelling in complete freedom.

## prestige version for more demanding customers.

\*Painted bumper optional feature

Seven models with simple, robust style. Extremely practical and functional, for a flexible holiday, with no constraints, or for daily use. Maximum functionality in outfits, optimised interior spaces, smart solutions. Livingstone can surprise you even with the substance of its basic version.

Models characterised by an exclusive design, by functional solutions, suited to use in the winter, with the finest equipment, all as standard: manual climate control and electric mirrors, driver and passenger airbags, cruise control, electric living quarters access step, panoramic skylights, seat covers, cab blind and flyscreen, radio provision and built-in antenna, winter pack.

#### ExPS EVO

ExPS Evo, the exclusive technology for insulating the interior of the campervan from outside temperatures and noises ensures better heat and acoustic insulation also thanks to the absence of thermal bridges with the outside. Materials with excellent performance and appropriate construction solutions ensure that the

+insulation+protection-noise

High performance is guaranteed by the use of material with high insulation performance, polyester fibre covered with a film of aluminium, covering the internal walls, ceiling, crossmembers, pillars and rear doors:

- Total coverage. The flexibility of the material allows it to be inserted in cavities as well.
- Absence of thermal bridges.
- Uniform coverage to promote constant internal temperatures

- Reduces the time to reach pleasant temperatures inside the vehicle by 50%, even when starting from extremely cold conditions;
- Increases the uniformity of temperature inside the various areas of the campervan by more than 65%;
- Maintains temperatures with greater consistency and longer for more comfortable environments.

Noise tests relating to external agents (test carried out with calibrated sound meter and certified by the SIT centre) have also demonstrated that the noise perceived inside the campervan in the event of rain is lower than 37% in the dinette area and -30% in the rear area.

With Extreme Protection System EVO,

## Same performance as a motorcaravan!

Roller Team has tested its campervans in the climate chamber, basing itself on the EN 1646-1 standard, according to which a vehicle brought to -15° must, once the heating systems have been activated, reach an internal temperature of 20° in 4 hours. Livingstone, in its basic configuration, fully satisfied the target at a little over 3 and a half hours, thus earning "grade 3" performance. The result is comparable to the performance of a medium motorhome (with length of 7.4 metres and rear central bed) which, with an internal volume double the campervan but

very different build, bodywork and materials, reaches the target in the same time.

This is all possible thanks to ExPS Evo technology, which makes Livingstone a van suited to winter use.

The **Prestige** version proceeds to offer the **Winter Pack** as standard, with additional equipment that enhances on-board comfort still further in the event of the coldest conditions, proving the product best suited to those who prefer certain colder destinations:

- Grey water tank insulated with a 15 mm layer of polyurethane.
- Electrical probe with thermostat positioned close to drain valve.
- Insulation of external water pipes.
- Insulation of external heating pipes.

## Want even more?

Well then, here's the Arctic Pack, optional equipment, made up of:

- C6 combigas boosted heater-
- Thermal blind to protect side windows.
- Thermal blind to protect dashboard-
- Insulated rear curtain.

Exclusive equipment tested in the climate chamber:
Livingstone equipped with Arctic Pack reached the target of the standard in 95 minutes!

The form, furnishings and design choices guarantee great living volume. All the space is designed with a view to maximum functionality, modularity and ease of use.

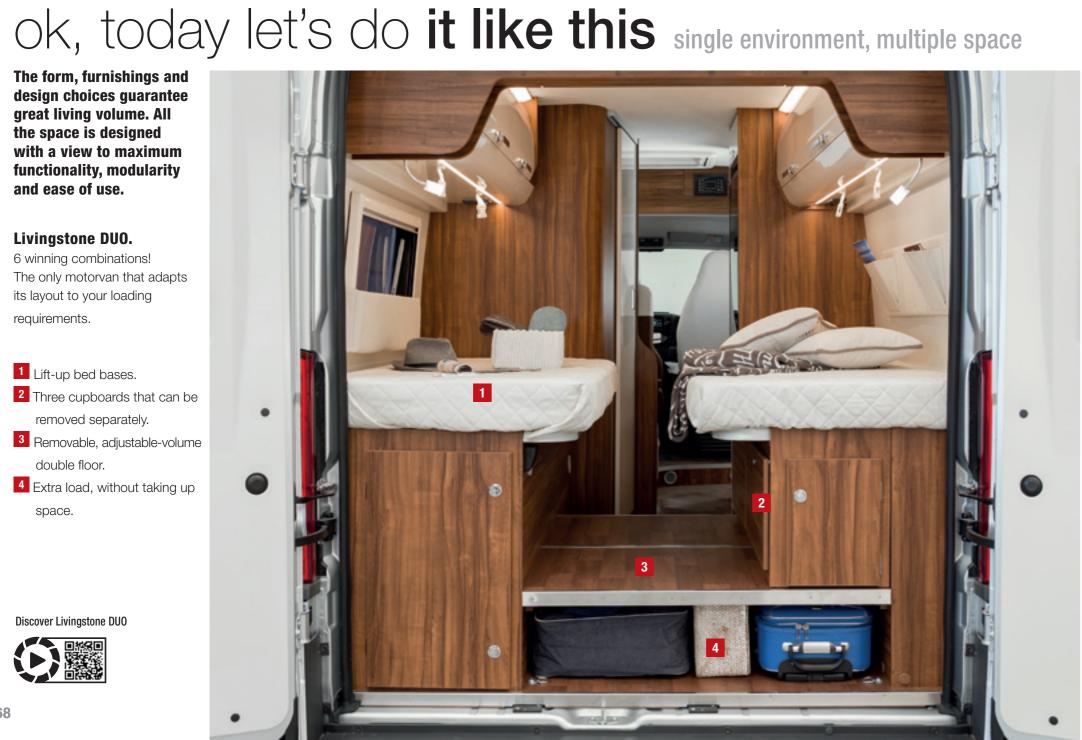

#### Livingstone DUO.

6 winning combinations! The only motorvan that adapts its layout to your loading requirements.

- Lift-up bed bases.
- 2 Three cupboards that can be removed separately.
- Removable, adjustable-volume double floor.
- 4 Extra load, without taking up space.

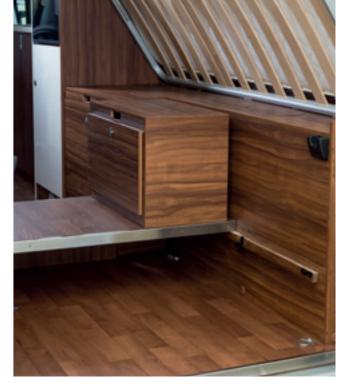

Discover Livingstone DUO

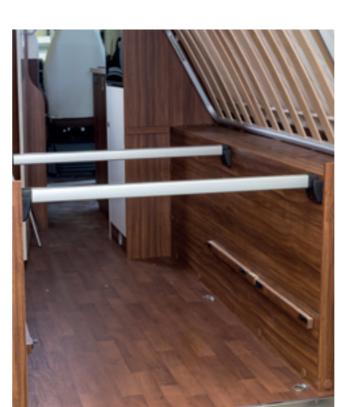

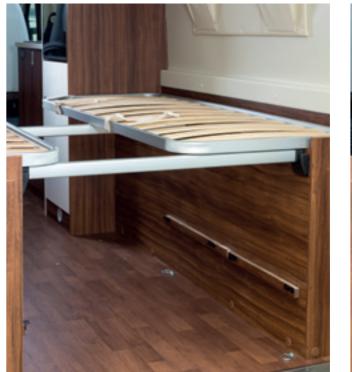

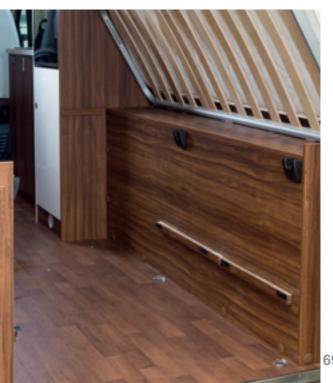

## optimised interior space

K3 and 6 models: with central walk-on shower and double sliding blind to separate the areas according to use.

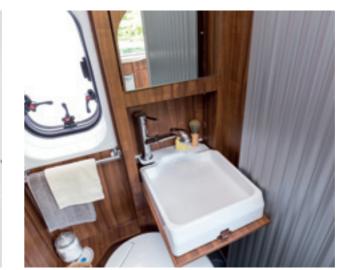

Garages equipped for transporting larger items thanks to removable or lift-up beds. Under-bed storage.

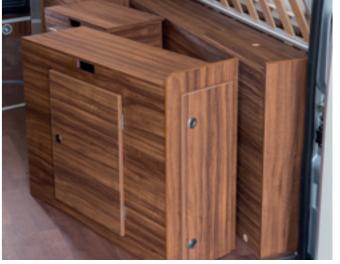

2 Prestige model: the bed base folds to leave the wall units accessible.

Toilette with sliding or drop-down sink to extend the space available.

6 model: two removable rear cupboards for greater storage, only when needed.

The sliding internal doors don't take up space and make it easy to move through the passenger compartment.

# New ideas to make a van, your van

# Original accessories

Personalise your vehicle for your needs with ease: here are our solutions to make your motorcaravan even more unique.

Roller Team offers additional packages and accessories that adapt perfectly to the individual models to increase their versatility, optimise their functionality and boost their performance.

### Choose your driving profile

Safety. A driving assistance systems that helps the driver cope better with unexpected events that may occur on the journey. The Traction+ package includes: vehicle stability control device, the Hillholder assistance system for climbs, or Hilldescent system for coming down, and the traction support device for poor grip on a single drive wheel.

Every journey will be accompanied by your favourite soundtrack thanks to the High-Level radio with or without navigator with USB port or by the freedom to talk and use your smartphone even when you're driving. Also available in touchscreen and DAB version.

To ensure that you have maximum visibility and safety with the LED DRL headlights or fog lights, excellent visibility with peerless lighting, and for longer.

Free up your left foot. With the automatic transmission, you increase safety and your personal comfort when driving.

The right  $\overline{\text{rims}}$  for your touch of style. Rims are essential to the appearance of the whole vehicle.

15' alloy wheels in two colours available, Dark Grey and Matt Black.

# Enhance the comfort of your motorcaravan

To welcome an extra travel companion on board in complete comfort! A specific bed kit for converting the dinette into a large bed. The kit is made up of 1 wooden structure with drop-down leaves and 1 mattress, contained in a handy, easy to transport sack.

Make your vehicle exclusive with the packages designed for you. Racing Pack: 16" alloy wheels, LED DRL headlights, 3500 kg capacity.

Traveller Pack, carpeted cab, cab blind, flyscreen for sliding door. Extra Pack: Automatic climate control, Touchscreen Radio, rear-view camera.

Protect the interior and mattresses, to sleep soundly. With the specific bed covers, your mattresses will be protected against rubbing and use, so they can last longer.

# Made to measure for you

Ideal when parked for enjoying all the freedom your vehicle has in store for you to the full, the outside veranda can also be requested in dark grey colour.

If you opt for a bike to get round in freedom having reached your destination, fit a dedicated bike rack on your campervan.
For holidays in great style!

It only takes a click to lock your parked vehicle if you request the optional electronic closing on the side door. Silent. Safe.

If you chose the campervan for its compact dimensions and manoeuvrability, you can ask for even more. When parking, you can make use of the assistance provided by the parking sensors installed in the bumper.

Winter holiday included with the specific optional winter equipment: Winter Pack, Arctic Pack, diesel or gas boosted heater.

S Standard 0 Optional - Not available VTR Fiberglas
Certified vehicle weight comprises: driver (75 Kg), fuel tank 100% fully filled (Flat 60 L, Ford 65 L), fresh water tank filled to 20 lt. (use of special drain valve) and aluminium gas bottles (max. 15 kg.) filled at 100% of their capacity, and certified tolerance (Directive 2007/46/CE). Anything which is not included in the standard version of the vehicle, concerning both living quarters and chassis, entails an increase of the mass in running order, with the consequent reduction in the useful load up to the possible reduction in the number of certified seats in case the total weight exceeds the value of the available payload. The available payload consists in the difference between the maximum permissible weight and the mass in running order, with a tolerance of 5%. Therefore, during the purchase phase it is recommended to carefully consider the weight of any optional equipment you wish to install on the vehicle. This weight is indicated in the specific item of the technical data sheets to be exceeded.

S Standard O Optional - Not available VTR Fiberglas

Certified vehicle weight comprises: driver (75 Kg), fuel tank 100% fully filled (Fiat 60 L, Ford 65 L), fresh water tank filled to 20 lt. (use of special drain valve) and aluminium gas bottles (max. 15 kg.) filled at 100% of their capacity, and certified tolerance (Directive 2007/46/CE). Anything which is not included in the standard version of the vehicle, concerning both living quarters and chassis, entails an increase of the mass in running order, with the consequent reduction in the useful load up to the possible reduction in the us is recommended to carefully consider the weight of any optional equipment you wish to install on the vehicle. This weight is indicated in the specific item of the technical data. Hence, please remember that the laws in force do not allow the maximum permissible weight indicated in the specific item of the technical data sheets to be exceeded.

S standard 0 Optional - Not available VTR Fiberglas
Certified vehicle weight comprises: driver (75 Kg), fuel tank 100% fully filled (Flat 60 L, Ford 65 L), fresh water tank filled to 20 lt. (use of special drain valve) and aluminium gas bottles (max. 15 kg.) filled at 100% of their capacity, and certified tolerance (Directive 2007/46/CE). Anything which is not included in the standard version of the vehicle, concerning both living quarters and chassis, entails an increase of the mass in running order, with the consequent reduction in the useful load up to the possible reduction in the number of certified seats in case the total weight exceeds the value of the available payload. The available payload consists in the difference between the maximum permissible weight and the mass in running order, with a tolerance of 5%. Therefore, during the purchase phase it is recommended to carefully consider the weight of any optional equipment you wish to install on the vehicle. This weight is indicated in the specific item of the technical data sheets to be exceeded.

S standard 0 Optional - Not available VTR Fiberglas
Certified vehicle weight comprises: driver (75 Kg), fuel tank 100% fully filled (Flat 60 L, Ford 65 L), fresh water tank filled to 20 lt. (use of special drain valve) and aluminium gas bottles (max. 15 kg.) filled at 100% of their capacity, and certified tolerance (Directive 2007/46/CE). Anything which is not included in the standard version of the vehicle, concerning both living quarters and chassis, entails an increase of the mass in running order, with the consequent reduction in the useful load up to the possible reduction in the number of certified seats in case the total weight exceeds the value of the available payload. The available payload consists in the difference between the maximum permissible weight and the mass in running order, with a tolerance of 5%. Therefore, during the purchase phase it is recommended to carefully consider the weight of any optional equipment you wish to install on the vehicle. This weight is indicated in the specific item of the technical data sheets to be exceeded.

S Standard 0 Optional - Not available VTR Fiberglas
Certified vehicle weight comprises: driver (75 Kg), fuel tank 100% fully filled (Flat 60 L, Ford 65 L), fresh water tank filled to 20 lt. (use of special drain valve) and aluminium gas bottles (max. 15 kg.) filled at 100% of their capacity, and certified tolerance (Directive 2007/46/CE). Anything which is not included in the standard version of the vehicle, concerning both living quarters and chassis, entails an increase of the mass in running order, with the consequent reduction in the useful load up to the possible reduction in the number of certified seats in case the total weight exceeds the value of the available payload. The available payload consists in the difference between the maximum permissible weight and the mass in running order, with a tolerance of 5%. Therefore, during the purchase phase it is recommended to carefully consider the weight of any optional equipment you wish to install on the vehicle. This weight is indicated in the specific item of the technical data sheets to be exceeded.

\$ Standard 0 Optional - Not available

Certified vehicle weight comprises: driver (75 Kg), fuel tank 100% fully filled (Fiat 60 L), fresh water tank filled to 20 It. (use of special drain valve) and aluminium gas bottles (max. 15 kg.) filled at 100% of their capacity, and certified tolerance (Directive 2007/46/CE). Anything which is not included in the standard version of the vehicle, concerning both living quarters and chassis, entails an increase of the mass in running order, with the consequent reduction in the useful load up to the possible reduction in the number of certified seats in case the total weight exceeds the value of the available payload. The available payload consists in the difference between the maximum permissible weight and the mass in running order, with a tolerance of 5%. Therefore, during the purchase phase it is recommended to carefully consider the weight of any optional equipment you wish to install on the vehicle. This weight is indicated in the specific item of the technical data. Hence, please remember that the laws in force do not allow the maximum permissible weight indicated in the specific item of the technical data sheets to be exceeded.

### Motorcaravan and Motorhome

## Chassis Pack

#### **CONFORT PACK** (standard)

**AUTO-ROLLER SPECIAL EDITION. AUTO-ROLLER** Wider track, Fix&Go, special suspensions and camping tyres, central cab locking, power windows, ABS, ESP, driver's AIRBAG, trip computer, cruise control, electric mirrors, driver and passenger's seats with longitudinal adjustment and seatback reclining with double armrest, height-adjustable driver's seat, radio with speakers in the cab.

**ZEFIRO, GRANDUCA, TRIACA** Wider track, Fix&Go, special camping tyres, central cab locking with remote control, power windows. electric mirrors with defroster, athermal windows, ABS, driver and passenger's AIRBAG, bulb DRL, driver and passenger's seats with longitudinal adjustment and seatback reclining with double armrest, height-adjustable driver's seat and painted bumpers, radio provision with speakers in the cab, antenna integrated in the rear mirror, cup-holder and tablet-holder in the cab. For vehicles with swivel seats: passenger's seats with adjustable height.

#### **AUTOMATIC PACK** (optional, Ford 45 kg, Fiat 22 Kg)

ZEFIRO, GRANDUCA, TRIACA Automatic gearbox, leather steering wheel and gearshift knob.

## Body Pack

#### PACK START DIGIT (optional, 11 Kg)

**AUTO-ROLLER SPECIAL EDITION,** AUTO-ROLLER, ZEFIRO, GRANDUCA Digital aerial antenna. TV LCD LED 17" with DVD. TV holder.

#### WINTER PACK GAS (optional, 9 Kg)

#### **AUTO-ROLLER SPECIAL EDITION, AUTO-ROLLER, ZEFIRO, GRANDUCA**

Combined gas heating 6000W with CP Plus, drain water tank insulation and electric probe, outside water drain pipe heated, insulated step, insultaed cab curtain.

#### WINTER PACK DIESEL (optional, 9 Kg)

#### **AUTO-ROLLER SPECIAL EDITION. AUTO-ROLLER, ZEFIRO, GRANDUCA**

Combined diesel heating 6000W with CP Plus, drain water tank insulation and electric probe, outside water drain pipe heated, insulated step, insultaed cab curtain.

### **Notes**

\*: Optional to be requested when ordering the vehicle. To increase the vehicle payload, when travelling it is possible to reduce the fresh water tank capacity to approx. 20 lt. The data shown are provisional and must be confirmed at the time of certification.

- (a) Maximum total weight of the vehicle not to be exceeded.
- (b) Certified vehicle weight comprises: driver (75 Kg), fuel tank 100% fully filled (Fiat 60 L, Ford 65 L), fresh water tank filled to 20 lt. (use of special drain valve) and aluminium gas bottles (max. 15 kg.) filled at 100% of their capacity, and certified tolerance (Directive 2007/46/CE). Anything which is not included in the standard version of the vehicle, concerning both living quarters and chassis, entails an increase of the mass in running order, with the consequent reduction in the useful load up to the possible reduction in the number of certified seats in case the total weight exceeds the value of the available payload. The available payload consists in the difference between the maximum permissible weight and the mass in running order, with a tolerance of 5%. Therefore, during the purchase phase it is recommended to carefully consider the weight of any optional equipment you wish to install on the vehicle. This weight is indicated in the specific item of the technical data. Hence, please remember that the laws in force do not allow the maximum permissible weight indicated in the specific item of the technical data sheets to be exceeded.
- (c) The vehicle in running conditions must have the fresh water tank filled to its minimum capacity: 20 liters, using the special drain tap.
- (d) It is a system that allows to adjust the height of the rear bed to reduce or increase the volume of the garage. Models with garage and rear fixed bed can also be requested without Flex Space.
- (e) Separation system with interior tent or with rigid door depending on the model.

## Chassis Pack

Van

#### COMFORT PACK (standard Sport)

Fix&Go, central cab locking with remote control, power windows, athermal windows, double armrest. ABS, driver AIRBAG, bulb DRL, driver and passenger's seats with height and longitudinal adjustment and seatback reclining, cup-holder and tablet -holder in the cab.

#### COMFORT PACK (standard Prestige)

Fix&Go, central cab locking with remote control, power windows, athermal windows, double electrical mirror with defroster, double armrest, ABS, driver and passenger's AIRBAG, bulb DRL, driver and passenger's seats with height and longitudinal adjustment and seatback reclining, car radio predisposition, cupholder and tablet -holder in the cab.

#### RACING PACK (optional, 18 Kg)

16" alloy wheels, DRL, max weight 3500 Kg.

#### AUTOMATIC PACK (optional, 22 Kg)

(2,3 MJ) Automatic gearbox, leather steering wheel and gearshift knob

## Body Pack

#### PACK TRAVELLER optional Sport - standard Prestige, 13 Kg)

Sport: pleated cab blind, flyscreen for entrance door. Prestige: cab seat covers, body carpet, pleated cab blind, flyscreen for entrance door.

#### PACK JOY (optional Sport, 2 Kg)

Double electrical mirror with defroster, 4 speakers in the cab, passenger's airbag, antenna integrated on the rear mirror.

#### PACK EXTRA (optional, 24 Kg)

Automatic air conditionning, touch screen radio, rear camera.

#### PACK EXTRA DAB (optional, 24 Kg)

Automatic air conditionning, touch screen DAB radio, rear camera.

#### WINTER PACK (optional Sport, 4 Kg)

Wastewater tank insulated by a 155 mm poliuretanic layer. Electrical probe with thermostat located near the drain valve. Isolation of external water pipes.

#### ARCTIC PACK (optional, 7 Kg)

Heating (Prestige), internal protection for windows and dashboard, insulated curtain

### Notes
