## "A JOURNEY OF A THOUSAND MILES BEGINS WITH A SINGLE STEP"

- LAO TZU

Most of us loves to travel. We like to visit new places, meet interesting people and experiment with the local cuisine. However very often we lack the motivation to pack our bags and hit the road.

Affinity campervans are ideal tool to make a first step and fulfil your dreams of trips to the most beautiful and interesting places in Europe.

History of Affinity is not so long. It's only been a few years. This short time is a period of enormous effort of our whole crew. The effort, which has ensured Affinity's dynamic development.

Our individual experience in designing and building campervans is much longer. They date back to the beginning of this century. We started working together in 2012 and since then we have been continuously working on it. For us it's not only professional activity – it's primarily our passion and source of satisfaction.

When we started working on Affinity together with our Swedish partners, we clearly defined the assumptions of the new project. We wanted to go our own way, build an innovative brand with original functional solutions, distinctive design and great attention to quality.

We are consistently implementing this plan.

We systematically develop our production capacity.

At the beginning of the year 2023, we launched a second production line and significantly increased the numbers of the produced campervans. For the year 2024, we have prepared two new premiers. We hope that they will be welcomed by our potential customers and will become the next models guaranteeing Affinity further stable development.

Jacek Jaskot  
CEO Affinity RV

Norbert Adamczewski

## OUR VANS 23/24

Affinity campervans are produced on two brands of chassis. Affinity series (models: One, Duo and Five) are made on Fiat Ducato Vans. The Affinity M series (models: Duo and Four) are made on MAN TGE. The specification of the base vehicles is very rich and the standard equipment of the Affinity living part includes items which are available from other manufacturers for an additional fee.

## AFFINITY <sup>M</sup> DUO

PAGE 26

## AFFINITY <sup>M</sup> FOUR

PAGE 30

Fiat Ducato has been the most popular chassis used by campervan manufacturers for many years. Three models in the Affinity offer are based on this proven construction. Among them there is most frequently chosen by customers – model Affinity One.

# Enjoy the space

The Affinity One ensures a comfortable daytime space and sleeping berths for 2, 3 or 4 people. What makes it stand out from other campervans is the feeling of space you get when you're inside. The lavatory at the rear, the L-shaped kitchen behind the passenger seat, large windows and skylights make the interior bright and spacious. All of this combined with cutting-edge design and colour schemes give the interiors of our campers an original look and a unique style.

The moveable headboard allows the bed to slide to the back, increasing the kitchen space.

## INNOVATIONS

The biggest innovation of the Affinity One is its sleeping arrangements. With a few simple adjustments, the front passenger bench seat converts into a bunkbed, with a safety barrier on the upper level. The mattress area provides a comfortable night's sleep even for adults. The biggest advantage of this solution is that the bunkbed is folded out only for sleep – when folded away it doesn't restrict the space inside the vehicle.

The system for converting the seat into a bunkbed is an original, legally protected solution from the designers of Affinity One. You won't find it in any other camper on the market.

We use high-quality materials and fittings to make our campers. The furniture is made from HPL panels, most of which are held together with glue, not only screws – making our interiors much more durable. The technologies we use guarantee a long usable life, without the risk of damage or scratches. They ensure perfect quiet and a lack of distracting noises even after you've travelled many kilometres.

The French bed at the rear of the vehicle is equipped with a lifting system. It enables you to raise the bed frame to the level which allows you to transport two bicycles inside the vehicle. The lifting mechanism is activated electrically.

The cargo space includes a 230 V outlet for charging electric bicycles.

The Affinity One is the only campervan with an L-shaped kitchen. The large sink, two-burner gas hob, 90 l compressor fridge and large counter make up an exceptionally comfortable space for cooking.

Affinity One campers are fully prepared for winter use. That's made possible by the double floor and outstanding insulation. Heating is provided by Truma Combi system. The entire water system, including the tanks, is in a heated space.

The numerous electric sockets, USB ports and cordless phone charger allow you to use all the devices you need when travelling. The vehicle can be equipped with solar panels of up to 360 watts.

The state-of-the-art electrical system ensures reliable operation of all technical equipment in our campers.

Inside the spacious lavatory is a folding sink, and behind the mirror is a cabinet with a 230 V outlet. The toilet bowl is ceramic.

The interior building of Affinity One offers users a large number of compartments and places to store equipment necessary for travelling. Apart from hanging and inside cabinets, there is a wardrobe for clothes which needs to be transported on the hangers.

Affinity Duo is one of the most original campervan on the market. The unique functional layout and modern design have made this model one of the strongest points in the Affinity offer. Its popularity caused, that very similar interior plan is offered also on MAN TGE base.

# Ideal for two

Many campervan users travel as a couple. For this group of clients we prepared a new model. Affinity Duo is a camper, by which two people can travel comfortably. In everyday use of every campervan there are three important things: comfortable bed, functional kitchen and spacious bathroom. Therefore the bed in Affinity Duo is wide, the sanitary part is equipped with a separate shower and space around the kitchen allows couples to cook together.

The bed in Affinity Duo can be easily unfolded, extending its width to 138 cm. Even when unfolded we save access to the toilet and shower.

Affinity Duo was created with thought about people who value independence. People who reluctantly use campsites and rarely visit motorhome service points. A significant advantage of Affinity Duo is its autonomy. Space for two 11 l gas bottles, clean water tank of 200 l and possibility to install solar panels with maximum power of 360 W will allow for long, independent journeys. Big number of cabinets, an impressive storage compartment under the bed and boot in the back will fit all necessary travel equipment.

A separate shower cubicle significantly increases the comfort of using the bathroom. Thoughtful layout of handles, shelves and hangers makes the entire sanitary area comfortable to use.

Unusual for campervans, the external access to the gas box allows easy exchange of gas bottles without need to empty the boot. System Travel Mate and external connection socket allows filling of the cylinders at petrol stations.

Thanks to the option of lifting the shelf dividing the boot, the space for transporting the luggage can be increased. This allows transportation of skis or other long items.

# Family vacation

Affinity Five is one of the few campervans dedicated to a family of five. Despite the limitations resulting from the small area, the functional layout of this campervan allows comfortable traveling in a combination 2+3 (two adults and three children). The space that this vehicle offers is comparable to much longer campervans or caravans.

The second row bench has a slightly sloped backrest and width that allows three people to travel. In a very simple way the sofa can be converted into a comfortable bed.

There is a three-level bunk bed at the rear of the vehicle. The standard length of the mattresses is 135 cm, but each of the levels can be individually extended to 170 and 180 cm.

The sofa at the front of the campervan can be converted into a comfortable double bed in a few easy steps. Thickness and quality of the mattresses used in the front sofa guarantee a calm sleep.

Depending on the needs, the surface of the bed mattresses in the three-level bunk bed can be shortened or extended. With the rear part of the mattresses raised, the boot space is significantly increased.

Thanks to the option of foldable beds the interior of the boot can be adjusted to transportation of the skis or other long items. The luggage compartment provides enough space for accessories necessary for travel.

Tested and well rated by the customers layout of the integrated shower cabin and foldable sink guarantee exceptional bathing comfort.

MAN TGE is one of the most modern delivery vehicles on the market. Innovative technical solutions, aesthetics and reliability are the features that make this vehicle an ideal base for Affinity campervan building.

# Ideal for couple

DUO M is another Affinity model designed with thought of people travelling in two.

Functional solutions adapted to the needs of two users and driving comfort of the MAN TGE is a combination, which will satisfy the most demanding travellers.

Affinity M Duo is a model addressed to people who value independence. Two hundred litres clean water tank, 2 gas cylinders with the possibility to refuel at a gas stations, space for the solar panels with a high-power enable for long trips without necessity for visiting campsites and service points. This is a model with a double floor, fully adapted for winter travels.

All water tanks are located inside the vehicle.

Affinity M Duo apart from the technical facilities has very important advantages from the point of view of the user. It guarantees: a large bed, functional kitchen and a comfortable bathroom.

The bed in Affinity M Duo in the unfolded form for sleeping is 132 cm wide and 190 cm long. When folded, the surface of the bed still remains large enough to provide comfortable rest for one person. Even in the case of an unfolded bed there is an access to the toilet and shower located at the end of the vehicle.

An important advantage of the Affinity M Duo compared to the Duo version is a bigger capacity of the trunk. It will accommodate more accessories necessary for travel. There is a large sized storage located under the bed.

The chassis of the MAN TGE is longer than the Fiat. It allowed for use of the very practical layout of a bathroom. It is equipped with a separate shower cabin and space in front of it is spacious and allows for comfortable use of the sanitary section.

Every Affinity DUO has a special pocket for wireless charging of phones.

The number of drawers in Affinity M Duo allows to transport a big number of pots and all the equipment needed for cooking.

The gas box in the Affinity M Duo is accessible from the side of the vehicle. This solution enables convenient replacement of the cylinders.

Access to the boot, toilet cassette and external shower is possible by lifting the flap at the rear of the vehicle.

# Well organised space

Affinity M Four is a campervan dedicated for 4 people (two adults + two children). Compact sizes combined with the driving properties of the MAN TGE guarantee the driver driving comfort comparable to passenger car. Despite very limited space, the functional layout of this model allows comfortable travelling in a 2+2 arrangement. A bunk bed in the back of the vehicle and a fold-out sofa in the front allow for a comfortable rest for the whole family.

The main double bed is created by folding down the second row seat. The unfolding process is extremely simple and quick. The way to return the seat to its original condition is equally simple. The bunk bed in the back is intended for children.

Similarly as in the case of other Affinity versions, the functional layout of this vehicle is unique. The solution with an unfolding bed at the front of the camper and the bunk bed in the back is a combination which is only available in Affinity M Four. The possibility of enlarging the space in the trunk and the large wardrobe under the fridge provide enough space for all accessories needed for travel.

The area of the integrated bathroom in Affinity M Four is large enough to comfortably use the shower and the sanitary facilities. The plexiglass door effectively protects the cosmetics cabinet from getting wet while bathing.

A fridge placed above the wardrobe, large integrated bathroom, sofa with an optimally inclined backrest enable comfortable use of the camper. After unfolding the bed, there is still plenty of communication space – access to the bathroom and exit from the vehicle is not blocked. It is also possible to use the stove and the fridge.

AFFINITY ONE

4 driving places and 2 sleeping berths (optional 4+3, 4+4)
French bed with adjustable headboard
Truma Combi 4E gas-electric heating
LiFePO4 120 Ah Board Battery
Double floor
Cab window blinds
Electric entry step (70 cm)
Flyscreen on entry door
Cordless phone charger
Roof vent with electric fan in kitchen
Skylight with electric fan in lavatory

Wall, floor and ceiling insulation	10/20 mm
Shower cabin	Integrated
Chemical toilet	Cassette, 19 L
Skylights	x3
Ventilation fans	x2
Cooker	Gas, 2 burners
Refrigerator	90 L
Fresh water tank (insulated)	110 L
Grey water tank (insulated)	100 L
Interior height	196 cm
French bed dimensions	192 x 129 cm
Optional bunk bed dimensions	
Upper bed	192 x 67 cm
Lower bed	182 x 67 cm

AFFINITY DUO

2 seats for driving, 2 sleeping berths
Truma Combi 4E gas-electric heating
LiFePO4 120 Ah Board Battery
Double floor
Cab window blinds
Electric entry step (70 cm)
Flyscreen on entry door
Cordless phone charger
Roof vent with electric fan in kitchen
Skylight with electric fan in lavatory

Wall, floor and ceiling insulation	10/20 mm
Separate shower cabin	66 x 57 cm
Chemical toilet	Cassette, 19 L
Skylights	x3
Ventilation fans	x2
Cooker	Gas, 2 burners
Refrigerator	70 L
Fresh water tank (insulated)	200 L
Grey water tank (insulated)	100 L
Interior height	196 cm
French bed dimensions	190 x 138 cm

AFFINITY FIVE

5 seats for driving, 5 sleeping berths
Truma Combi 4E gas-electric heating
LiFePO4 120 Ah Board Battery
Double floor
Cab window blinds
Electric entry step (70 cm)
Flyscreen on entry door
Isofix
Roof vent with electric fan in kitchen
Skylight with electric fan in lavatory

Wall, floor and ceiling insulation	10/20 mm
Shower cabin	Integrated
Chemical toilet	Cassette, 19 L
Skylights	x3
Ventilation fans	x2
Cooker	Gas, 2 burners
Refrigerator	70 L
Fresh water tank (insulated)	100 L
Grey water tank (insulated)	100 L
Interior height	196 cm
Front folding bed dimension	188 x 125 cm
Dimensions of the bunk bed:	
Upper bed	172 x 62 cm
Middle bed	180 x 69 cm
Bottom bed	172 x 62 cm

AFFINITY M DUO

2 seats for driving, 2 sleeping berths
Truma Combi 4E gas-electric heating
LiFePO4 120 Ah Board Battery
Double floor
Cab window blinds
Electric entry step (70 cm)
Flyscreen on entry door
Roof vent with electric fan in kitchen
Skylight with electric fan in lavatory

Wall, floor and ceiling insulation	10/20 mm
Separate shower cabin	66 x 57 cm
Chemical toilet	Cassette, 19 L
Skylights	x3
Ventilation fans	x2
Cooker	Gas, 2 burners
Refrigerator	70 L
Fresh water tank (insulated)	200 L
Grey water tank (insulated)	100 L
Interior height	195 cm
French bed dimensions	190 x 132 cm

AFFINITY M FOUR

4 seats for driving, 4 sleeping berths
Truma Combi 4E gas-electric heating
LiFePO4 120 Ah Board Battery
Double floor
Cab window blinds
Electric entry step (70 cm)
Flyscreen on entry door
Cordless phone charger
Roof vent with electric fan in kitchen
Skylight with electric fan in lavatory

Wall, floor and ceiling insulation	10/20 mm
Shower cabin	Integrated
Chemical toilet	Cassette, 17 L
Skylights	x2
Ventilation fans	x2
Cooker	Gas, 2 burners
Refrigerator	90 L
Fresh water tank (insulated)	100 L
